

My pet

This is my pet stick bug. Its name is **Bob**. It has got a long body and small fangs. Bob has some health issues, because Bob should have 6 legs, but it only has 5. Its claws are sticky, if they weren't Bob would fall off twigs. Bob eats a lot of leaves, it loves basil! My stick bug lives in a big jar. Bob likes when its home is soggy because Bob drinks water from walls of its jar. I brought Bob and its sibling from my English classes. My teacher gave me them! I had 6 stick bugs, but I gave 2 of them to my cousin.
